

Product Finder Feature

Enable Effortless Visibility for Consumers to Locate Your Products and Sales Teams to Visualize the Distribution Footprint

Consumers Today are Conditioned to Search for Products on Mobile Devices

Consumers are increasingly turning to apps and websites to find the products they love wherever they happen to be at the moment.

GreatVines now offers a map-based “Product Finder” feature customers can add to their website(s). Give your customers up-to-date information on where they can purchase your products. Product Locator maps are also an exceptional tool for sales organizations, providing visualization of the distribution footprint, displaying location data for all recent On-Premise and Off-Premise “Accounts Sold” locations.

BOTTOM LINE

Product visibility is essential to both buyers and sellers. One simple tool accommodates both groups, ensuring everyone knows where they can locate your brands.

GreatVines Product Finder is quickly and easily deployed and can be fully skinned to reflect your brand identity with custom colors, fonts and even map markers.

Quick Integration

- Inexpensive plug-in
- Add to any webpage or mobile site in minutes
- Minimal coding required

Fully Customizable

- Support for custom colors, fonts and markers
- Extensive configuration options

Internal and External Facing

- Add to your website for consumers
- Add to GreatVines for internal users

Increase Brand Visibility

- Drive consumers to local accounts
- Increase retail sales demand
